Contract Inspection and Programming Services

Let **B.C. MacDonald & Company's** contract inspection services help. We scan at high speeds while maintaining accuracy. With thousand of points, "data density" we provide **TRUE** form and location of features.

Not getting enough data from your touch trigger probe?

We can check any 3-D features including: cylinders, bores, holes, shafts, irregular curves, and shapes.

If you have any questions regarding our services please call Travis, or Mike @
